

M7

The Sound of Serenity

Immerse yourself in the all new PRESTIGE M7, a yacht dedicated to the art of living.

THE MULTIHULL BY PRESTIGE: SMOOTH, EFFICIENT DESIGN

New dimensions in comfort

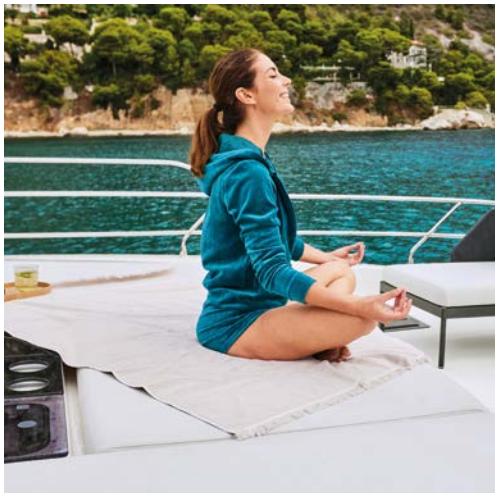

PRESTIGE has created a revolutionary new multihull platform for unrivaled space onboard. By extending the motor yacht's architecture to two hulls, you benefit from 20% more space on board than on a traditional monohull of equal length.

Multihull architecture by PRESTIGE results in optimized interior volumes, refined comfort, space and light, the sensation of proximity with the sea, and ultimately, of connection with nature and with yourself.

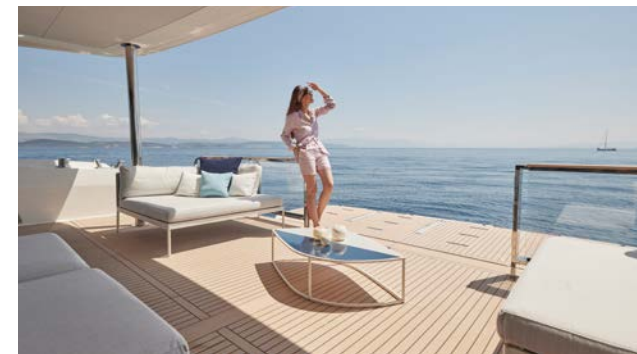

The benefits of a gentle pace

PRESTIGE M-Line guarantees optimal fuel efficiency, thanks to the multihull design. It is 30% more efficient than a monohull of equal length. The architecture of the M-Line offers a less expensive and more environmentally friendly experience. M-line yachts are adapted to a gentler, peaceful way of life, in harmony with your environment.

Stability for serenity

Whether cruising or at anchor, M-line two hulls demonstrate remarkable stability and safety: all exterior living areas – cockpit, foredeck, and flybridge – afford exceptional comfort. Optimized interior volumes in the saloon and cabins create a spacious, luxurious atmosphere. Enjoy smooth, serene cruising aboard your M-Line yacht, where the sea feels like home.

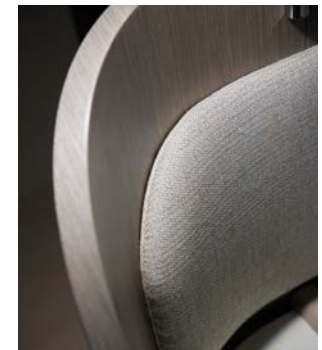

Harmony with the sea

Experience cruising in harmony, the M-Line offers true proximity with the sea, with multiple, easily accessible exterior living areas. Remarkable on the interior, as well, the saloon features large windows and sliding glass doors, providing a panoramic view of the landscape and the sea.

Natural quality finish

The streamlined contemporary design, the quality of materials, and the fit and finish on board all contribute to an experience of pure connection with the sea. Experienced designers and high-end partners offer a refined atmosphere on board focusing on environmental sustainability.

CONSCIOUS YACHTING

At every step in the process of product design, development, construction, and throughout the organization we are committed to reducing the environmental footprint of our yachts so that our customers can enjoy cruising in closer harmony with nature. The brand follows the Groupe Beneteau action plan, targeting a significant increase in the use of local and bio-sourced materials, as well as lower energy consumption.

Warranty Industry-leading 7-year warranty on the structure, and 3-year comprehensive warranty on M-line yachts.

Smaller engines for significant CO2 reduction (30% less than a motor yacht of equivalent length)

Organic cleaning and beauty products for clean water discharge

FUEL EFFICIENCY

Thanks to the multihull architecture, PRESTIGE M-Line guarantees optimal fuel efficiency. Moreover it offers more living space on board, making these models comparable with traditional monohull of greater length. In terms of consumptions, the M-Line brings a saving of 25% consumptions at 17kn and 40% less consumptions at 21kn compared to traditional monohull of equal living space offered on board.

Financial contribution

SILENT MODE:

As an option, the Silent MODE Pack integrates a large surface area of solar panels and a substantial lithium battery bank. This allows to run the yacht for 10 hours at night or 2 hours during the day without the generator running, offering an incredible comfort with no noise pollution, no vibration and no direct CO2 emissions.

Vegetable-Tanned Leather

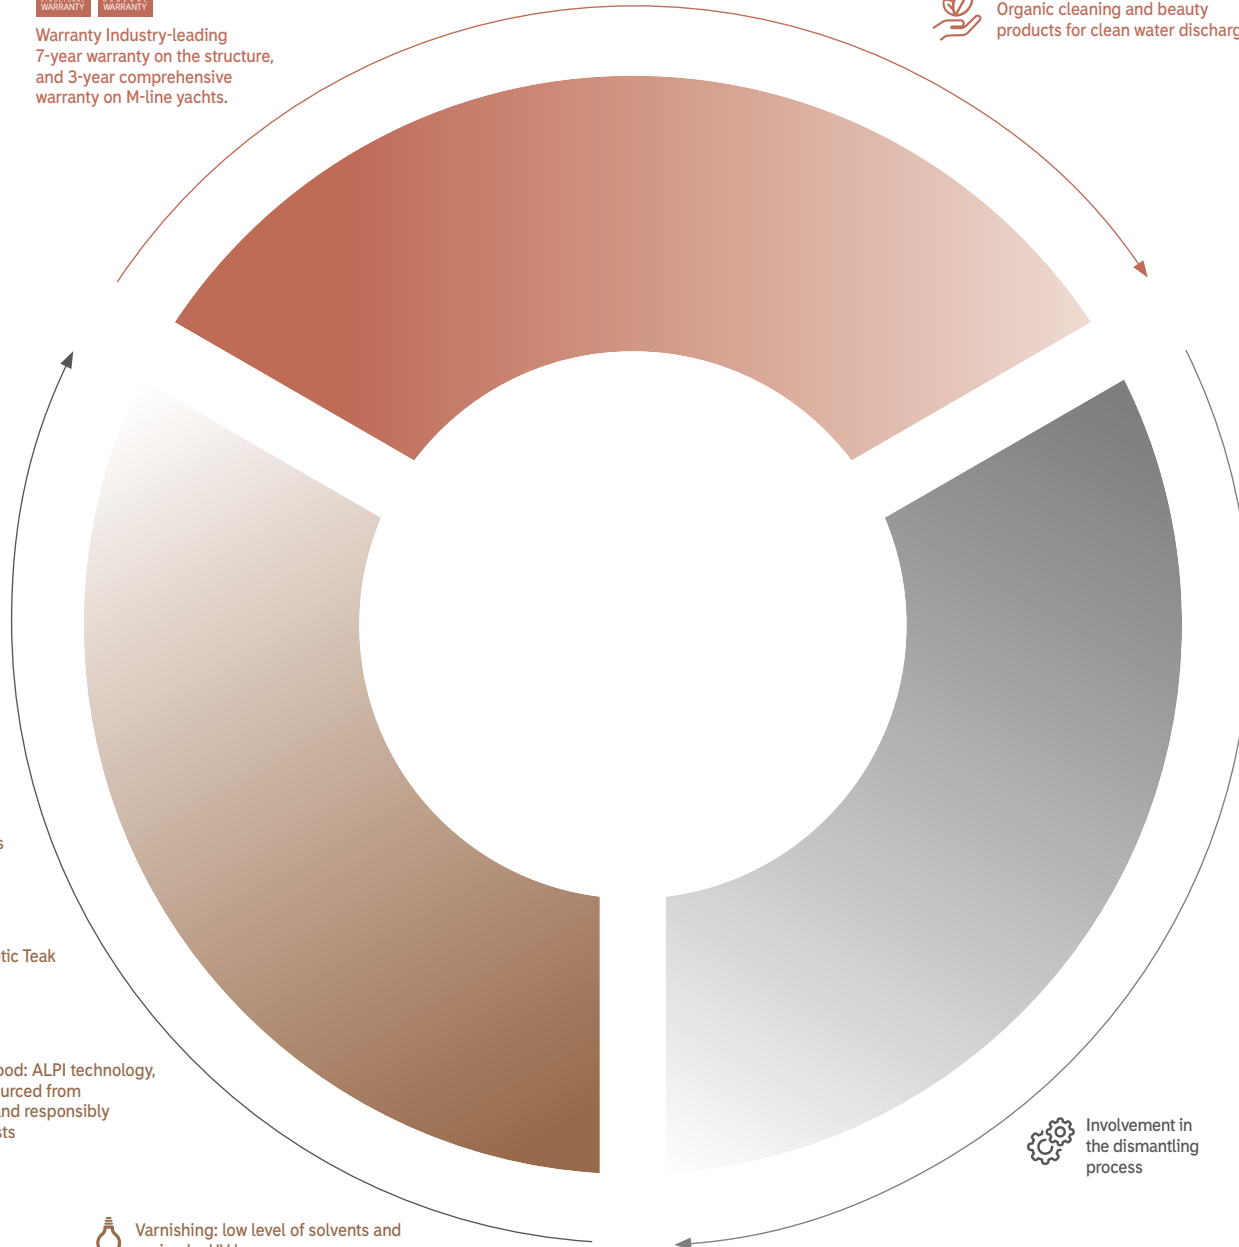

Organic & Fair-Trade Linens

Sustainable Synthetic Teak

Sustainable Wood: ALPI technology, for furniture sourced from FSC-certified and responsibly managed forests

Varnishing: low level of solvents and curing by UV lamps

Involvement in the dismantling process

|| We are honored to introduce you to the M-Line product range, the latest addition to the well-established family of PRESTIGE motor yachts. Created in the same PRESTIGE spirit of enabling people to savor precious moments at sea, the M-Line invites those looking for a quieter lifestyle to reconnect with nature and with themselves. Rich in space and light, using refined materials and engineered to the highest standards, these multi-hull-based yachts offer open, inviting spaces with the best views of the expanse and with unmatched comfort and connectivity with the water in pursuit of internal harmony. ||
